

LinkTag Reader for Phoenix Card Systems

- The ICS LinkTag reader is a module designed specifically to allow the LinkTags to be read by a Phoenix 8000 or Phoenix AFC fuel management system. The LinkTag reader emulates the Phoenix system's magnetic card reader, so it is automatically compatible with all versions of Phoenix system firmware.

- SIMPLE TO INSTALL** – The LinkTag reader replaces the card reader in a Phoenix system. Simply attach the 4 included screws and plug in the cable.
- SIMPLE TO OPERATE** – Once installed, the LinkTag reader constantly scans for a LinkTag. When the user holds a LinkTag within 2 inches of the reader face, the data is automatically read and transmitted to the card system.
- SECURE** – Each LinkTag reader contains a secret code which is required to communicate with LinkTags. Only LinkTags ordered for use with your system will work.
- RELIABLE** – Since the LinkTag reader has no physical connection with the LinkTags, there are no connectors to wear out or replace. ICS warranty covers the LinkTag reader for 2 years.

SPECIFICATIONS			
General			
LinkTag Reader Dimensions	4.0 in. x 3.0 in. x 1.0 in		
Comm. Range	2 inches	Weight	3.5 oz.
Data transfer speed	100K bits/sec	Write cycles	Unlimited
Temperature range	-20C – 50C	Read cycles	Unlimited
